

# Blue GSM Intercom

Power Supply **12/24VAC/DC**

Range **Unlimited**

Number of users **1 Household/office, 3 Divert Numbers**

The Blue GSM intercom is a telephone based intercom systems. It is ideal for sites where the distance between gates and house make it impractical to use wired or wireless intercoms.

The intercom panel is a telephone self dialing system, that will call a landline or mobile phone whenever somebody presses the call button. This allows you to open the gates from anywhere in the world.
