

STAR 500 Battery Backup

230V Battery Backup
BATTERIES 4no. 7Ah
OUTPUT VOLTAGE 230VAC

DESCRIPTION:

The Star 500 battery backup has grown from a simple battery supply into a modern high tech power regulation device. It has the ability to extend battery life in some cases helping a system to run for several weeks without power.

MAIN FEATURES:

- Power is always supplied from the batteries which are used to convert 48V DC into usable 230V AC.
- Built in temp control system monitors heat in the system and regulates with fans and improved ventilation.
- Optional switch puts Star into standby mode greatly increasing battery life.
- Perfect from both 230V AC and 24V DC gate systems.
- Batteries are sold separately allowing the Star to offer effective and flexible battery storage options. 4no. 7Ah batteries are recommended in most cases.
