

CLOUD BOARD

Connect to your sites remotely
via the SEA Cloud Board

DESCRIPTION:

The Cloud Board is SEA's newest innovation. This small, simple device plugs into the Jolly connection on modern SEA control panels, connecting them via WiFi to the SEA Cloud App. From here an installer can log in to the control panel in real time, view the display screen giving full menu access.

MAIN FEATURES:

Quickly diagnose problems on site and fix remotely

Store multiple sites on the app and access them when needed

Access the full control panel menu remotely

Store multiple sites on the app and access them when needed

Cloud Board with network cable, power & PCB link.
