

# SCHED Safety Edge Controller

Power Supply 12/24VAC/DC

## DESCRIPTION:

The SCHED is a CAT 2 safety edge controller which accepts up to 4 8k2 resistive inputs and provides 2 NC (normally closed) outputs. This allows older gate systems to be quickly and easily brought up to EN12453 standards providing the control panel has a stop and revers feature, such those found on our Gate 2 DG.

## APPLICATIONS:

- Sliding gates, swing gates, sectional doors, rolling shutters.

## ELECTRICAL CHARACTERISTICS:

- 2 N.C. outputs
- Available in protection category 2 (SCHED2) or protection category 3 (SCHED3).
- Supports up to 4 8K2 resistive edges

IP 55 case also available
