

MINI CND

8K2 Resistive Safety Edge

LENGTH UP TO 2.5M

PROFILE 38MM

DESCRIPTION:

The MINI CND safety edges are easy to install. They can be cut down at will because they use an inner TPE conductive strip. This allows the COMPACT to support a small discreet yet cushioned profile able to absorb impacts and react instantly to them.

APPLICATIONS:

- Sliding gates, swing gates, sectional doors, rolling shutters.

LENGTHS:

- 1200, 2000, 2500 mm.

TRIMMING LENGTHS:

- Any length down to a minimum of 100mm.

MECHANICAL CHARACTERISTICS:

- External structure in co-extruded thermoplastic.
- Soft rubber endcaps for total protection throughout the device.
- Operating temperatures: -10° + 55° C.

ELECTRICAL CHARACTERISTICS:

- TPE conductive strip.
- Resistive system with continuous self diagnosis (8.2 K Ω), applicable to all types of automatic closing systems.
