

PICCO CND

8K2 Resistive Safety Edge

LENGTH UP TO **2.5M**

PROFILE **14MM**

DESCRIPTION:

The PICCO CND safety edges are easy to install. They can be cut down at will because they use an inner TPE conductive strip. The small profile of the PICCO edge makes it ideal for use in hinge gaps where a low profile edge is required.

APPLICATIONS:

- Sliding gates, swing gates, sectional doors, rolling shutters.

LENGTHS:

- 2000, 2500 mm.

TRIMMING LENGTHS:

- Any length down to a minimum of 100mm.

MECHANICAL CHARACTERISTICS:

- External structure in co-extruded thermoplastic.
- Soft rubber endcaps for total protection throughout the device.
- Operating temperatures: -10° + 55° C.

ELECTRICAL CHARACTERISTICS:

- TPE conductive strip.
- Resistive system with continuous self diagnosis (8.2 K Ω), applicable to all types of automatic closing systems.
